Examples: A kiln has a full load amp rating of 60 amps $60 \times 1.25 = 75$ amps The BMW convertible top drive relay switch can be found in the fuse box.. This is according to the National Electrical Code You then need to bump this calculated amount up to the next standard size fuse or circuit breaker.. The amperage rating of the fuse or circuit breaker needs to be 125% higher than the full load amps of the kiln.
