Pages For Mac Viewer

If you can't open a Pages document, make sure that you have the latest version of Pages from the Mac App Store.. In the dialog, click a location in the sidebar on the left, or click the pop-up menu at the top of the dialog, then choose the location where the document is saved.. You can open and edit Microsoft Word documents (files with a doc or docx filename extension) in Pages, then save them as Pages or Word documents, or as PDFs.. Open an existing Pages documentYou can open Pages documents saved on your Mac, in iCloud Drive, on connected servers, and in third-party storage providers.. For a Word document, drag it to the Pages icon (double-clicking the file opens Word if you have that app).. Open an existing document in PagesIf you don't have access to a Mac, you can view the first page of a Pages document, the first worksheet of a Numbers workbook, and the first slide of a Keynote presentation.. Double-click the document to open it. Pages shows up to the last ten documents you opened Open a document stored somewhere other than your Mac (such as iCloud Drive): In Pages, choose File > Open (from the File menu at the top of your screen).

If a document is dimmed and can't be selected, it means the document can't be opened by Pages.. You can't open PDFs in Pages Open a document you recently worked on: In Pages, choose File > Open Recent (from the File menu at the top of your screen).. Do any of the following:Open a document on a Mac: For a Pages document, double-click the document name or thumbnail, or drag it to the Pages icon in the Dock or Applications folder.
